

Mr. Martinez Exam 1 Name: _____
STAT C1000 / Math 54 Fall 2026 (Practice)
Version P2

This is a closed book with no notes allowed exam. **PLEASE PRINT ALL ANSWERS.** Any answer that cannot be read will receive 0 points. Good Luck.

1) Answer each of the following (below) clearly and concisely. First identify the **variable of interest** (1 point), next state whether it is a **Qualitative** (categorical/attribute) variable or a **Quantitative** (numerical) variable (2 points), state whether it is **nominal, ordinal, discrete, or continuous** (2 points), lastly the **level of measurement** (2 points). **(7 points total each)**

A) The number of college courses you are enrolled in this semester.

B) The time of day you usually wake up on weekdays, recorded in military (24-hour) time.

C) The distance from your home to campus, measured in miles.

D) Agreement with the statement "I feel prepared for exams," rated on a scale from 1 (strongly disagree) to 5 (strongly agree).

E) The time it takes you to finish a typical STAT homework assignment.

2) The following is a statistical experiment. Please read carefully, and then identify the parts indicated in parts A–E below.

California State University, Long Beach wants to know the true average amount of money their students spend on coffee and cafe drinks per week **by class standing** (freshman, sophomore, junior, senior). They break up the student body into class-standing groups using enrollment records and take a random sample from each class standing for a total of 250 students.

A) What is the population parameter (proper symbol and description) of interest the university wants to estimate? (2 points each, 4 points total).

B) Describe the targeted population. Be specific. (2 points)

C) Describe the variable of interest involved (4 points). What type of variable and level of measurement is it? (4 points).

D) Describe the sample and which sampling method was utilized. (3 points)

E) What is the statistic including the proper symbol (4 points) and how would you calculate the statistic? (3 points)

End of Exam — Total: 59 points (Q1: 35 + Q2: 24)
